

ENVIRONMENT, ENERGY, SOCIAL RESPONSIBILITY AND
SUSTAINABILITY POLICY

At Kanyon Yönetim İşletim ve Pazarlama A.Ş., we regard the environment as an invaluable and irreplaceable asset and believe that it must be protected in the best possible way so that all living beings can benefit from it in the future.

Ensuring the continuity and sustainability of the world's, our country's and our community's resources, while promoting equal rights and opportunities, is among the fundamental principles that guide us.

In line with these principles, we are committed to:

Recognizing our social and societal responsibilities and embracing unconditional equality of opportunity. We aim to provide equal opportunities without discrimination based on language, religion, race, age or gender;

Embedding sustainability into every aspect of our lives and business, applying this approach not only to the responsible management of our resources but also to the long-term sustainability of our business;

Using natural resources as efficiently as possible, preventing waste and making resource efficiency an integral part of the services we provide;

Complying with all applicable legal and other requirements relating to our environmental and energy management systems, while striving to perform beyond regulatory requirements;

Continuously improving our environmental and energy management systems, ensuring the availability of the information and resources required to achieve our objectives and targets, encouraging the participation of all relevant stakeholders, and carrying out joint initiatives and training programs;

Anticipating and managing risks that may have adverse environmental impacts and identifying opportunities for improvement;

Implementing waste management practices based on the hierarchy of reduce, reuse, recycle and dispose;

Considering environmental impacts when selecting materials and equipment;

Continuously improving our energy management system and energy performance;

Supporting the procurement of energy-efficient products and services, as well as energy-efficient design practices.
